

Complaint regarding Notices Associated with Ex Parte Presentations in Proceeding 12-52

To Commission Staff,

I am sure you probably get inquiries about this a lot. However, it is disturbing to me that the notices which the Commission staff have posted associated with Ex Parte Presentation(s) submitted in connection with this proceeding (and with various other proceedings as well) all appear to say:

Request to withhold

Rulemaking or

Presentation

document from Public

These notices, such as the one at <http://www.fcc.gov/document/ex-parte-documents-received-3302012> (which includes a notice of an ex parte presentation that I submitted into this proceeding) are disturbingly similar to each other. I realize that the FCC is simply trying to fulfill a public notice requirement associated with ex parte documents that are submitted to the FCC by numerous members of the public. However, I have submitted ex parte material into this proceeding and it is my intent that the public view it, and my sincere hope that the FCC will in fact rule on it. There is no request from myself or anyone else, certainly none that I am aware of, to withhold any rulemaking that has been requested in the statements within the ex parte materials I have submitted. There has been no request, from myself or anyone else, certainly none that I am aware of, to withhold the ex parte materials I have submitted.

If there is such a request from anyone, I would like to be notified of it. However, I don't think any request to withhold rulemaking or to withhold a presentation document from the public (if any such request exists) should be considered to be valid, nor should it be honored by the Commission staff.

Perhaps this complaint may be considered to be pointless by whoever reads it and maybe you all use standard language in your notices and it is not considered to have any effect on what we have submitted to the FCC or the ultimate impact of our comments, petitions, etc. on your rulemaking. However, with so many people so concerned that things are being withheld or being kept from the public eye all the time, it's my personal view that you should read this complaint with an eye not only to addressing it within the context of this proceeding, but as well, considering how you post notices (and how they appear) when someone provides you with ex parte materials by submitting them into your ECFS system.

Thank you for your consideration of this complaint.
